

**Early Learning Centre &
Outside School Hours Care**

IMMUNISATION POLICY

This Policy must be read in conjunction with the Catholic Education Tasmania (CET) and Mount Carmel College policies, procedures and guidelines. As the Mount Carmel College ELC operates as part of the Catholic Education system in Tasmania, the interrelationship between ACECQA and Catholic Education Tasmania is acknowledged.

Policy Relevant to	All staff, families, children, volunteers & visitors
Last Reviewed	March 2026
Next Review	March 2026

When groups of children are together, illness and disease can spread rapidly. Preventable diseases such as measles and whooping cough can have serious health consequences for children, and especially young children. Staff members who work in an early childhood education and care service are also at increased risk of contracting certain infectious illnesses. Immunisation is a simple, safe and effective way of protecting people against harmful diseases. Our Service implements the Australian Federal Government's, 'No Jab No Pay' policy for families to be eligible for Child Care Subsidy (CCS).

PURPOSE

The purpose of this policy is to provide information to manage and prevent the spread of infectious illnesses and diseases. Our Service has a duty of care to ensure that all children, families, and educators are protected from infectious diseases whilst at the Service. Along with maintaining a clean and hygienic environment, this also includes notifying families and educators when an excludable illness or disease is present in the Service, maintaining a record of children's and educators' immunisation status, complying with relevant health department exclusion guidelines, and increasing educators' awareness of cross-infection.

SCOPE

This policy applies to children, families, educators, staff, visitors, Approved Provider, Nominated Supervisor and management of the Service.

NATIONAL QUALITY STANDARD (NQS)

QUALITY AREA 2: CHILDREN'S HEALTH AND SAFETY

2.1	Health	Each child's health and physical activity is supported and promoted.
2.1.2	Health practices and procedures	Effective illness and injury management and hygiene practices are promoted and implemented.
2.2	Safety	Each child is protected
2.2.2	Incident and emergency management	Plans to effectively manage incidents and emergencies are developed in consultation with relevant authorities, practiced and implemented.

EDUCATION AND CARE SERVICES NATIONAL LAW AND REGULATIONS

77	Health, hygiene and safe food practices
86	Notification to parents of incident, injury, trauma and illness
87	Incident, injury, trauma and illness record
88	Infectious diseases
90	Medical conditions policy
162	Health information to be kept in enrolment record
168	Education and care service must have policies and procedures
173	173 Prescribed information to be displayed
174(2)(a)	Notification to the Regulatory Authority- (a) any serious incident at the approved education and care service
175(2)(c)	Prescribed information to be notified to the Regulatory Authority- (2) any circumstance arising at the service that poses a risk to the health, safety or wellbeing of a child or children attending the service

IMPLEMENTATION

Immunisation is a reliable way to prevent many childhood diseases. Immunisation works by giving the person a vaccine (weakened or killed disease-causing bacteria or virus), against a particular disease. This makes the person's immune system respond in a similar way to how it would respond if they actually had the disease, but with less severe, or possibly no symptoms. The vaccine therefore leads to the creation of antibodies that provide future protection if the person comes into contact with the disease.

Immunisation also protects other people who are not immunised, such as children who are too young to be immunised, or people whose immune systems did not respond to the vaccine. This is because the more people who are immunised against a disease, the lower the chance that a person will ever come into contact with someone who has the disease. The chance of an infection spreading in a community therefore decreases if a large proportion of people are immunised, because the immune people will not become infected and can protect the vulnerable people; this is known as 'herd immunity'.

Children must meet the immunisation requirements to be eligible to receive Child Care Subsidy (CCS) under the No Jab, No Pay rules. The child must be:

- up to date with vaccinations appropriate for their age according to the National Immunisation Program schedule; or
- on an approved catch-up schedule, or
- have an approved medical exemption recorded on the Australian Immunisation Register (AIR).

Vaccination objection is not a valid exemption for CCS eligibility.

THE APPROVED PROVIDER/NOMINATED SUPERVISOR WILL:

- ensure that obligations under the Education and Care Services National Law and Education and Care Services National Regulations are met
- ensure information about immunisation, infectious diseases and exclusion periods is available to families at time of enrolment/orientation and is included in Family Handbook

- advise parents and families about the National Immunisation Program (NIP)
- ensure that evidence is provided for each child prior to enrolment that confirms the child is fully immunised for their age or has a medical reason not be immunised (Immunisation History Statement from the Australian Immunisation Register (AIR) as evidence) approved ECEC services must amend this policy as required if necessary]
- provide staff and families with information about vaccine-preventable diseases
- display wall charts about childhood immunisation schedules in the front foyer
- review children's immunisation regularly, updating the child's records kept at the service, and send reminder letters and emails to families as required
- develop a staff immunisation record that documents each staff member's previous infection or immunisations (including dates)
- encourage all new and current staff to complete the staff immunisation record (optional)
- update employee staff immunisation records as staff become vaccinated and this information is shared with the Centre Manager
- take all reasonable steps to encourage non-immune staff to be vaccinated
- document advice given to educators and other staff
- notify the Public Health Unit (PHU) of any outbreak of vaccine preventable diseases (1300 066 055) within 24 hours
- notify families when an outbreak of a vaccine-preventable disease occurs through various channels of communication:
 - verbally
 - through a letter from the school principal
 - posting a note or sign at the entry of the ELC building
 - via electronic message- Storypark/Ed smart broadcast
- notify the Regulatory Authority of any incidence of a notifiable infectious illness or disease through the NOA-ITS within 24 hours
- exclude any child who is not immunised from the Service if and when an outbreak of a vaccine-preventable disease occurs to protect that child and to prevent further spread of infection. In the instance of the child being immunised but the immunisation record has not been sighted by the Service, the child is to be considered as not being immunised.
- advise female employees of childbearing age s to discuss Cytomegalovirus during pregnancy (CMV) with their doctor if they are planning a pregnancy and inform

management so that their individual risk can be assessed and managed. There is NO vaccination to prevent against infection with CMV. Educators working with young children in ECEC services have an occupational risk of contracting CMV [see: Pregnancy in Early Childhood Policy].

FAMILIES WILL:

- ❖ adhere to the Service's policies regarding *Dealing with Infectious Diseases, Immunisation, Sick Children* and exclusion requirements
- ❖ provide the Service with a copy of one or more of the following documents:
 - o An Australian Immunisation Register (AIR) Immunisation History Statement which shows that the child is 'up to date' with their scheduled vaccinations; or
 - o An AIR Immunisation History Form on which the immunisation provider has certified that the child is on a recognised catch-up schedule; or
 - o An AIR Immunisation Medical Exemption Form which has been certified by a GP
- ❖ provide the service with an updated copy of their child's current immunisation record every 6 months, or when the next scheduled immunisation has been completed. A current AIR Immunisation History Statement can be accessed at any time by the parent/guardian through logging in to their Medicare online account: [myGov website](#).
- ❖ support their child's exclusion from the Service if there is an outbreak of a vaccine preventable disease at the Service or if they come into contact with a person with a vaccine preventable disease, even if there is no outbreak at the Service.

INFORMATION TO BE DISPLAYED IN SERVICE

INFORMATION	WEBSITE/INFORMATION	PHONE NUMBER
The National Immunisation Program (NIP) Service	<u>https://beta.health.gov.au/initiatives-and-programs/national-immunisation-program</u>	1800 020 103

Notification of an occurrence of an infectious disease/vaccine preventable disease	Notify local Public Health Unit Provide information to families about the infectious disease- Children unimmunised against vaccine preventable diseases must be excluded from care	1300 066 055
Australian Government Department of Health	In the event of a community spread virus- (COVID-19) publications from Government agencies will be displayed https://www.health.gov.au/resources/collections/coronavirus-covid-19-campaign-resources	1800 020 080

TASMANIA (TAS)
Children do not need to be immunised to attend early childhood education and care services. Children who are not immunised must be excluded if there is an outbreak of a vaccine preventable disease. The National Immunisation Program (NIP) Schedule TO BE DISPLAYED IN THE SERVICE can be accessed and downloaded from: https://www.health.gov.au/resources/publications/national-immunisation-program-schedule-portrait • Adult and child immunisation • Childhood vaccinations • Tasmanian Department of Health and Human Services immunisation hotline (1800 671 738) • Australian Government Australian Immunisation Register • Australian Government Immunisation history statement
